

SAP Business One

The Complete ERP Solution for Aluminium Composite Panel (ACP) Manufacturing

Integrated. Intelligent. Built for Performance.

SAP Business One empowers ACP manufacturers with end-to-end visibility and control across operations, quality, inventory, and finances—driving efficiency, compliance, and profitability.

Advanced Raw Material & Inventory Management

Track aluminium coils, chemicals, and consumables in real time with accurate stock, lot, and expiry management.

Integrated Quality Control

Ensure consistent quality with in-process inspections, test recording, and automated QC workflows.

Costing & Margin Visibility

Accurate product costing, real-time margin analysis, and profitability insights for better decisions.

End-to-End Production Control

Manage the entire production lifecycle — from order to finished panel.

Variant & Finish Management

Handle multiple variants, colors, textures, and finishes with ease.

Batch Traceability & Compliance

Trace every batch from raw material to finished product for full compliance and recall readiness.

Production Planning & Optimization

Plan smarter, schedule efficiently, and optimize capacity to reduce waste and lead time.

One Integrated Solution. Complete Control.

THE INDUSTRY REALITY

ACP manufacturing is driven by:

- High-value raw materials like aluminium coils and chemical coatings
- Multiple product variants (metallic, wood, marble, fire-retardant panels)
- Precision-driven production processes and coating technologies
- Strict quality and durability expectations across applications

WITHOUT A CONNECTED SYSTEM, BUSINESSES FACE:

- Inventory inconsistencies and raw material losses
- Lack of batch traceability
- Production inefficiencies and rework
- Delayed decision-making due to fragmented data

WITH SAP BUSINESS ONE, YOU GET:

- Real-time visibility across your entire operations
- Streamlined inventory and batch management
- Improved quality and compliance
- Efficient production and reduced waste
- Better margins and faster decision-making

One Solution. End-to-End Control.

Built for ACP Manufacturers
