

# SAP Business One for Cables & Wires Manufacturing

Integrated. Intelligent. Built for Performance.

**1** **Advanced Inventory Management**  
Track high-value raw materials like copper, aluminum, PVC, compounds & accessories in real time with batch, lot & location-wise visibility.

**2** **Stage-wise Production & Rejection Tracking**  
Manage multi-stage cable manufacturing with real-time tracking of rejections, wastage & rework to reduce losses and improve yield.

**3** **Integrated Quality Management**  
Ensure consistent product quality with in-process, final inspection, test result tracking, and compliance with industry standards.

**End-to-End Solution to Streamline Operations, Ensure Quality & Drive Profitability**

**4** **Harness Manufacturing Management**  
Streamline harness & wiring assembly with BOM management, routing, work instructions, sub-assemblies & real-time traceability.

**5** **Production Planning & Material Requirement Planning (MRP)**  
Optimize production schedules, plan material requirements accurately, and ensure on-time delivery with efficient use of resources.

## INDUSTRY CHALLENGES WE SOLVE

-  High-value raw materials like copper and aluminum requiring strict control
-  Production losses due to untracked rejections and wastage
-  Lack of visibility into machine efficiency and utilization
-  Complex multi-stage production processes
-  Inefficient planning leading to delays and excess inventory

 Better Control of Costs | 
  Higher Quality & Compliance | 
  Improved Efficiency & Productivity | 
  Optimized Inventory & Reduced Waste | 
  Timely Delivery & Customer Satisfaction
